

Manual of 3A UBEC V3.0

Features:

1. Low-voltage and over-heat protection
2. Excellent stability and high-efficiency.
3. The output is powerful, with the output short circuit protection function
4. Strong anti-interference capability with shielding case to avoid radicalization, the output wire equipped with magnet circle to absorb the interfere wave.
5. LED can indicate working status.

Specification:

1. **Input:** 5.5V-28V (2-6 cells lithium battery pack or 5-18 cells NiMh /NiCd battery)
2. **Output Voltage:** 5V or 6V (Changeable with an select switch, also means you can change by jumper on UBEC)
3. **Continuous output current:** 3 Amps
4. **Size:** 46mm*17mm*7mm (length*width*height)
5. **Weight:** 11g
